Assignment 1

Game Report

PERERA K A H D – IT22603722

1. Game Title

Space Sword Game

2. Student Name and IT Number

Student Name: Perera K.A.H.D
IT Number: IT22603722

3. Summary of the Game Concept

Space Sword Game is a 2D action-based fighting game developed using Unity. The game is set in a futuristic space environment where the player controls a space soldier who fights an alien using a modern energy sword.

Objectives:

- Defeat the alien enemy
- Reduce enemy health to 0
- Gain score (credits) by attacking

Game ends when:

- Player health = 0 → Game Over
- Enemy health = 0 → Player Wins

4. Core Features Implementation

Player Movement:

- Move left/right using keyboard
- Uses Rigidbody2D and Transform

Attack System:
- Press Space to activate SwordHitbox
- Hitbox detects enemy and applies damage

Enemy :
- Moves forward/backward
- Jumps periodically

Health System:
- Player and Enemy health managed via scriptsScore System:
- +10 per hit
- 100 score = win

Game Manager:
- Handles win/lose conditions

Collision:

- Uses BoxCollider2D and triggers

Audio:

- Background music and sound effects

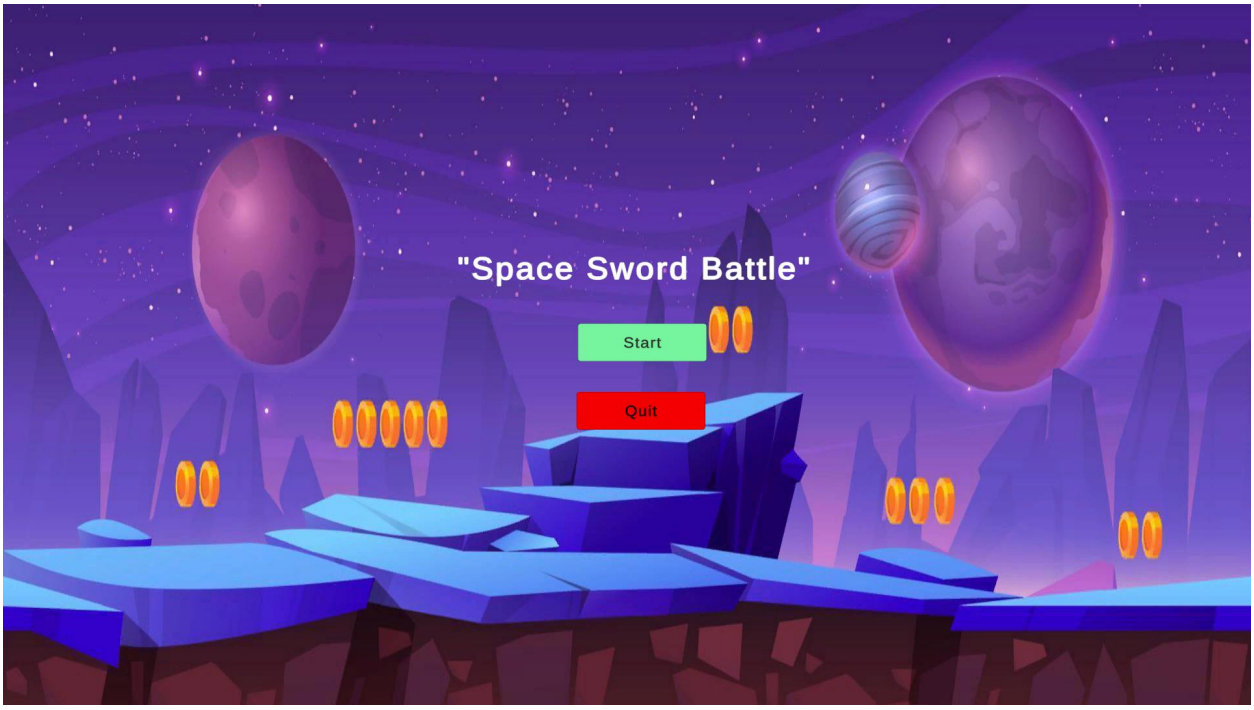
UI:

- Health, Score, Menu buttons

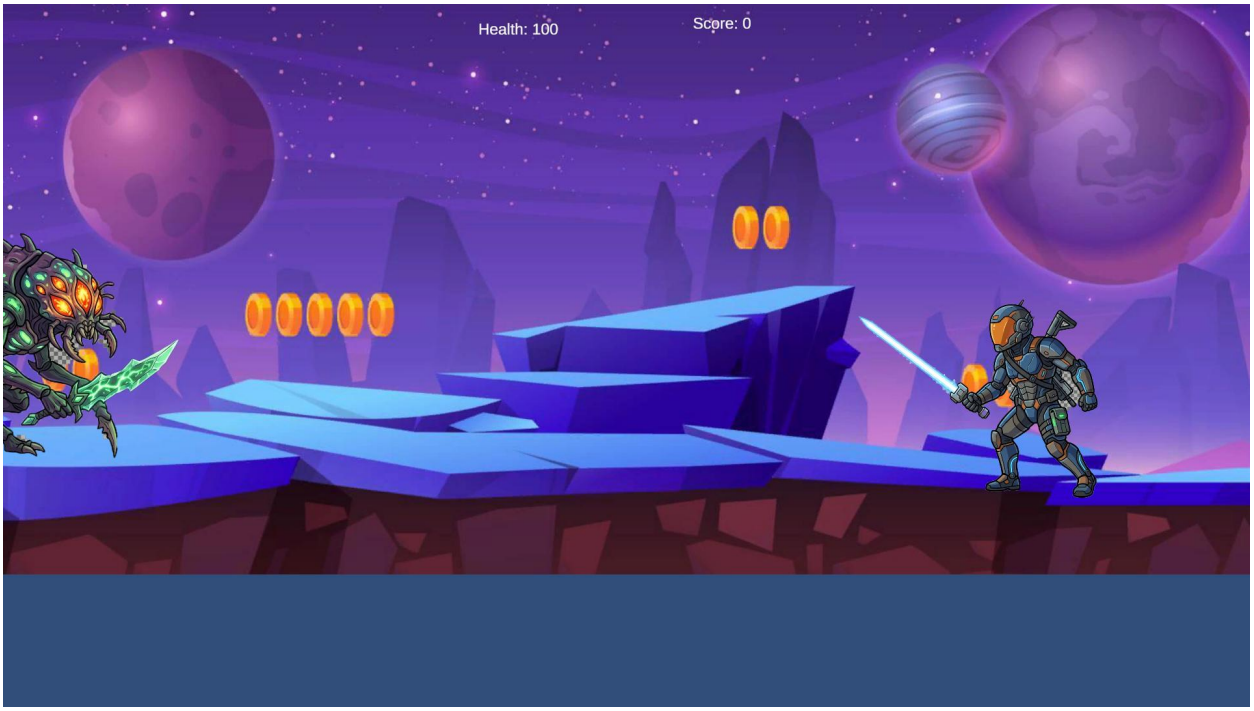
5. Screenshots of Gameplay

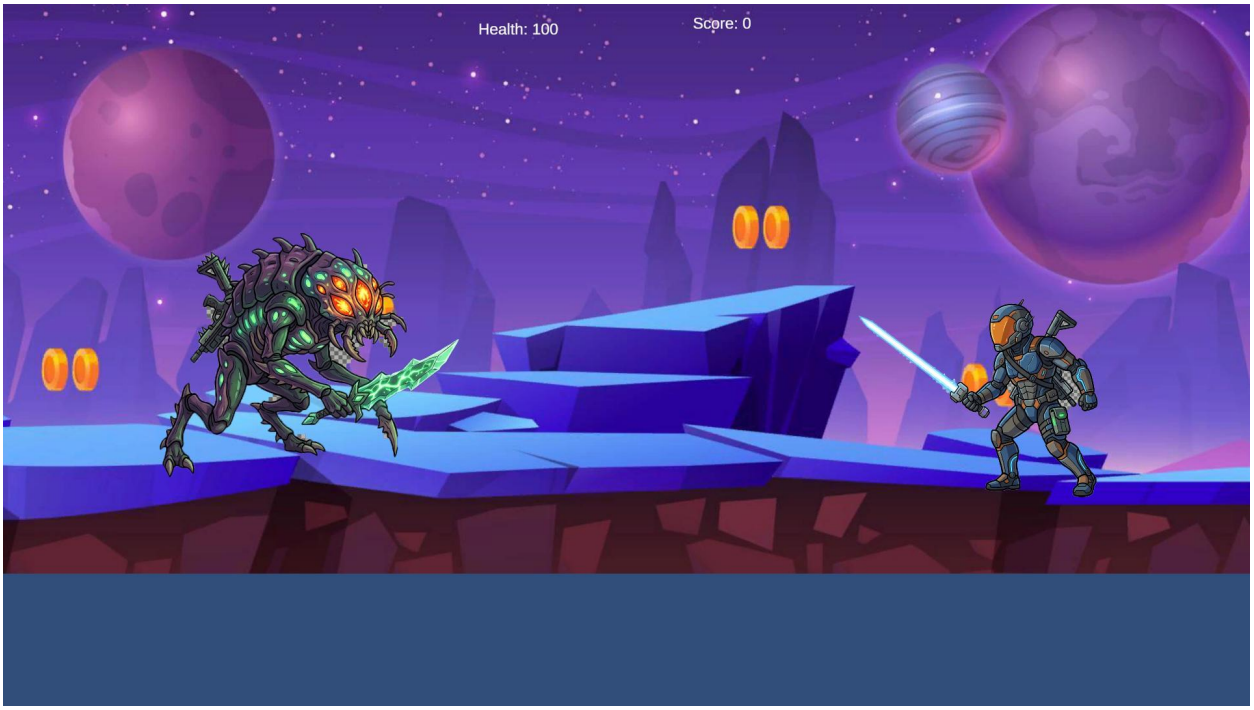
Insert screenshots here:

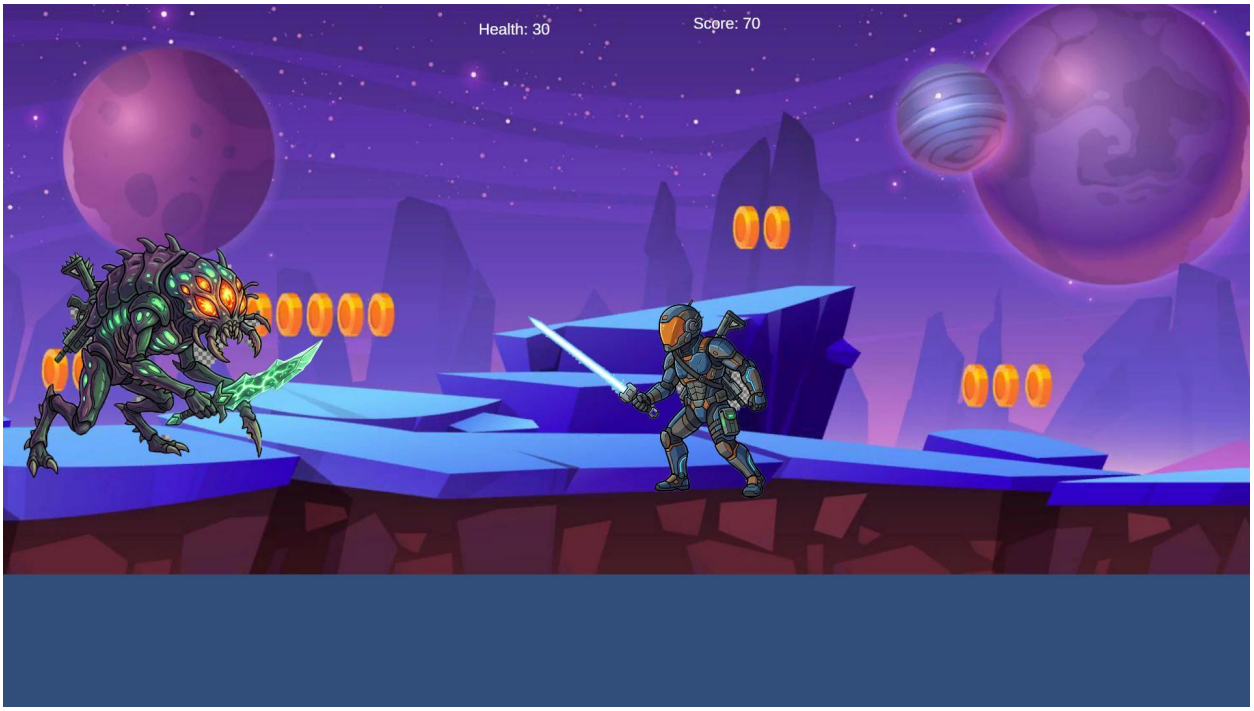
- Main Menu



-Gameplay







6. Control Guide

Move Left: A / Left Arrow

Move Right: D / Right Arrow

Jump: Space

Attack: Space

7. Creative Feature

Sword Hitbox system allows realistic attack detection.

Enemy includes movement and jumping.

characters and backgrounds enhance creativity.

8. Credits

Unity Game Engine

Free sound libraries
